

Camouflage — Now You See Me, Now You Don't

Certain species in the animal kingdom evolved over time to display some type of camouflage. In this course students discover specific adaptations that allow animals to blend into their environment for them to survive. Some use camouflage to hide from predators, while others use it to hunt for prey. Join us for an immersive look at camouflage and try to "see" what we mean.

Grade: Elementary, Middle, High School

Standards Supported

Next Generation Science Standards:

3-LS4-2. Use evidence to construct an explanation for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing.

MS-LS1-5. Construct a scientific explanation based on evidence for how environmental and genetic factors influence the growth of organisms.

HS-LS2-8. Evaluate evidence for the role of group behavior on individual and species' chances to survive and reproduce.
